

Zero Gravity Thrill Ride Amusement Park offers video files recorded on a CDROM in the following formats:

- MP4 - <http://www.sanyodigital.com/downloads.aspx>
- AVI - <http://en.wikipedia.org/wiki/AVI>

MP4

In order to play the MP4 video files recorded on your ZG CDROM , you will need to download Apple Quicktime player for FREE at: <http://www.apple.com/quicktime/download/>

AVI

In order to play the AVI video files on your ZG CDROM you will need to use Windows Media Player. Latest updated can be downloaded from the official Microsoft Web Page for FREE at: <http://www.microsoft.com/windows/windowsmedia/default.msp>

MPG

In order to play MPG video files we recommend to update your video codecs on your PC. Zero Gravity suggests downloading K Lite Codec Pack from

http://www.free-codecs.com/download/K_Lite_Mega_Codec_Pack.htm

Zero Gravity is no way affiliated with K-Lite software and is not liable for any issues arising from installing it on your personal computer or device.

If you still cannot play the video files, please contact us at 972 484 8359

Thank you,
Zero Gravity Team
